ALUMINIUM PERGOLA SYSTEM

04 -12

## ABOUT US

Welcome to EXTRAORDINARY! The LOUVREMASTER® system by awnings.co.za. The first adjustable flat aluminum roof to be designed and manufactured in South Africa.

After 25 years of active participation and innovation in the awnings industry we are proud to introduce this flagship product in our range.

Working out of a 2000 sqm factory, advanced machinery and 25 Staff members we have the capability of supplying the local and export markets. We have over 20 years experience in exporting into Africa, Indian Ocean Islands and the USA

## ALUMINIUM LOUVREMASTER® SYSTEM

Transform your garden into a fancy dream, creating an outdoor space for relaxing and dining. With durable aluminium construction and a versatile louvre roof, you can savour the sunshine and breeze during the sunny season.

For shade and protection from the sun, a pergola creates an outdoor entertaining area for you to enjoy. Control the sunshine and breeze with the manual louvre function and construct yours on a porch, patio, or pool area.

The Pergola System transforms your outdoor space into a multi-use area, with covering and protection available no matter the weather.

# LOUVREMASTER® SYSTEM FEATURES

Custom made up to 6m x 4m in one bay.

Stylish and modern design

Cool underneath.

- Anthracite /White

65°C opening manual louvre roof system

With side wall options all season useable.

4 seasons resistant to climatic conditions

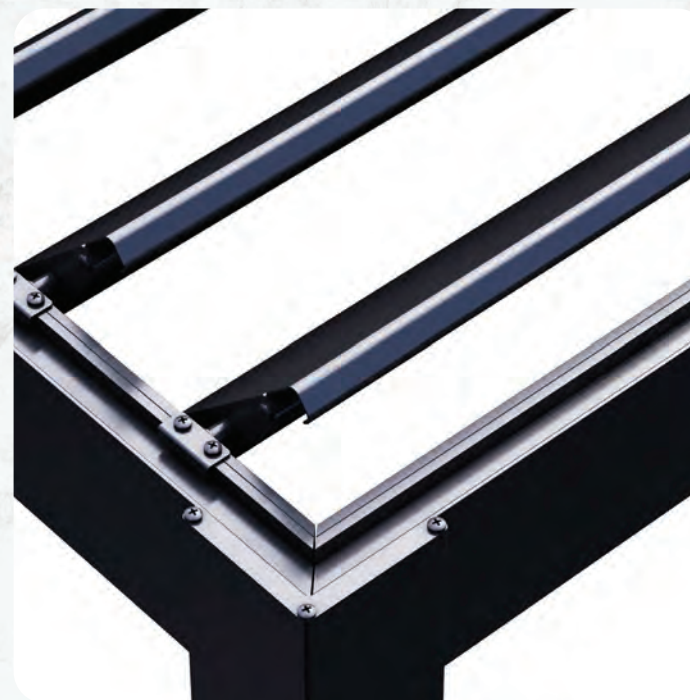

Mechanical Roof and Remote Control Roof Options

Easy Cleaning

LED lighting system optional.

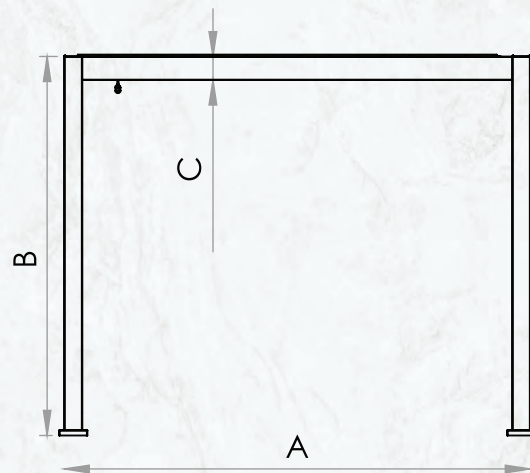

## DESCRIPTION

The Key feature of the Pergola's unique design is the vented roof louvres, the winding mechanisms allow you to control the direction of the roof louvres manually creating an open or closed space.

The genius built-in drainage system means that if the weather changes, just close the pergola's louvred roof to make the area completely weatherproof, any rainwater that lands on the louvres will flow into guttering channels and drain through the legs to the ground.
